

QSR Fast Casual

Elo delivers the widest range of interactive technologies for quick serve and fast casual restaurants. From the point of sale to the kitchen and all the self-service touch points in between, let Elo help you captivate your restaurant guests with commercial-grade touchscreens from 10 to 70 inches. Whether you want a wall-mount, shelf-mount, pole-mount, table-mount or fully-integrated kiosk, Elo has a commercial-grade solution to create brilliant, engaging experiences designed to fit your needs.

Point of Sale

Provide restaurant guests with a seamless customer experience using edge-to-edge glass touchscreens for speed and cleanliness. Add a customer facing display and engage guests with information, loyalty programs and promotional content, making it easier than ever to upsell and increase ticket size.

Menu Board

Attract and engage guests with an interactive digital menu board that grabs attention from a distance and encourages visitors to interact up close while waiting to order or be seated. Entice patrons with dynamic food and drink visuals and relevant content promoting the menu, daily specials and even your brand story. Instantly deploy content updates for menus and nutritional information without incurring major printing costs.

Self-Order Kiosk

Give guests the choice of self-service ordering on a bright and beautiful touchscreen kiosk. Decrease wait times, improve order accuracy and encourage upsell with an immersive larger-than-life touchscreen menu selector.

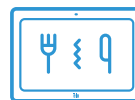

Table Ordering

Streamline customer service and check out by enabling on-demand service for guests with high-performance touchscreens at every table. Increase order accuracy and enable a dynamic menu that can change throughout the day, while providing infotainment and games at the table.

Kitchen Touch Displays

Upgrade the kitchen system with commercial grade touchscreen monitors and all-in-one touchscreen computers for easy order management. With an interactive bump bar, built-in cable management and flexible application uses including recipe viewers, time clocks, and employee training; touchscreen systems can help improve kitchen operations.
