

USC-513 POS System

Boost Sales with Enhanced POS Integration

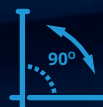

Supports Android and Linux Platforms

Integrated Peripherals

Compact Footprint

Flippable Main Display

Embedded Gravity Sensor

More Integration, Less Fuss

The USC-513 POS system integrates a printer, scanner, customer-facing display, and MSR in one terminal to reduce counter clutter, ideal for limited spaces.

Embedded Gravity Sensor

An embedded gravity sensor enables automatic rotation of displayed content.

Flippable Main Display

When equipped with only one display per client requirements, the screen supports a 90-degree tilt to flip between staff and customer-facing modes.

Enhanced Cable Management

The I/O interface is concealed under the stand for better cable management and to prevent easy disconnection.

Efficient Mainboard Maintenance

By loosening just four screws, the stand base cover can be removed, making the internal mainboard easy to access for maintenance.

Easy-to-Maintain Built-In Printer

Easily repair printer by removing only two screws.

Expand Application Possibilities with an Integrated POS System

Self-Service Kiosk

Provides services like self-queuing and information checking.

Self Checkout Kiosk

Reduces labor costs and enhances efficiency and speed.

POS System

Streamlines setups and operation with an integrated printer and scanner.

Tablesides Ordering Kiosk

Improves engagement, order accuracy, and table turns.
