

WHAT ARE THE ET60/ET65 ENTERPRISE TABLETS?

The most versatile rugged Android business tablets

Maximize productivity and business efficiency with the business tablets that deliver more — more features, more power, more security, more ruggedness and more versatility. Designed for work, the ET60 Wi-Fi and ET65 Wi-Fi and cellular enterprise tablets are ready for your most punishing environments, while offering all the beauty and ease of use of a consumer tablet. The flexible ET60 and ET65 can be whatever you need them to be — a tablet, a laptop alternative and a vehicle mount computer. And many feature options and accessories allow you to create the perfect solution for every job.

WHY SHOULD YOU BUY THE ET60/ET65?

TOP 5 CUSTOMER BENEFITS

1

Simplify operations with the power of a single platform.

Say good-bye to the old days of purchasing different single-purpose devices for each task and environment. The highly versatile ET60/ET65 meets the needs of so many different jobs — a handheld tablet, desktop computer in the office and a fixed vehicle mount computer in forklifts, including in freezer/cold chain operations. That means there's just one platform to purchase, manage and maintain. And you gain a new level of operational agility, as it's easy to take the ET60/ET65 from one use case to another as your needs evolve.

2

More than rugged — it's rugged redefined.

The ET60 and ET65 pass more real-world tests than any other tablet in their class. They're drop-tested to concrete, dustproof, freezer-proof, rated for hose-downs, ready for all the elements including rain, snow and ice. Additional tests make these tablets even more rugged, including thermal shock, heavy exposure to sunlight and an impact test on the touch screen. When mounted in Zebra's vehicle dock, the display and warehouse keyboard are heated to withstand condensation in freezer environments. The result? Your workers get a tablet they can count on no matter what.

3

Connect to the fastest networks today and tomorrow.

Next-level productivity requires next-generation connectivity. The ET60/ET65 is the only tablet in its class that supports Wi-Fi 6/Wi-Fi 6E and 5G. Workers get faster upload and download speeds, more reliable connections and better quality video calls. The increased bandwidth and lower latency enable advanced ARCore applications like augmented reality and machine learning. And if you plan to deploy private 5G or CBRS¹ networks for reliable, cost-effective connectivity in yards, ports, warehouses or energy sites, the ET65 has you covered.

4

Achieve peak levels of workforce productivity.

These workhorse tablets are loaded with features that help get the job done faster. A next generation computing platform delivers virtually instant response times in the most demanding applications. A super bright 1000 nit display ensures workers can view the information they need in virtually any lighting condition. And workers can capture barcodes in-hand and up to 40 ft./12 m away²; high-resolution photos to document condition; and standardized data such as shipping container numbers, meter readings and more³.

5

Mobility DNA — your tablet's built-in advantage.

Zebra keeps you fully covered with the industry's most complete and proven software tools. Mobility DNA makes every aspect of owning your tablets easier, with applications, utilities and tools that maximize device performance — from integration and security to deployment for easier management and optimization. For example, you can stage tablets in seconds. Control which GMS services and apps are available. Boost device security by adding features to Android. Get dependably superior Wi-Fi connections. And much more.

APPLICATIONS

Warehouse, Ports, Yards

- Loading/unloading
- Cross docking
- Yard management
- Inventory management
- Picking
- Cold storage
- Staff communications

Manufacturing

- Plant floor management
- Maintenance and repair
- Quality assurance
- Mobile HMI
- And more

Field Service

- Routing and dispatch
- Mobile work orders
- Meter reading
- Inspection and compliance
- And more

Public Safety

- Incident/patient reporting
- Routing and dispatch
- In-vehicle inventory management
- And more
