

# GREATER PRODUCTIVITY THROUGH POWERFUL SCANNING

As barcodes become more complicated – smaller and denser – your business needs a scanner to rely on and provides fast and accurate barcode scanning, empowers workers and helps you achieve operational goals.

## XENON ULTRA PREMIUM BARCODE SCANNER

The Xenon Ultra 1960g and 1962g premium barcode scanners incorporate Honeywell's next generation of scanning capability- allowing retailers to stay productive and keep customer service as their top priority, reducing wasted seconds from each transaction.

### PRECISE SCANNING

The green-dot LED aimer and white illumination aids in easier targeting and enhances scan accuracy on high density and low quality codes in high throughput environments.

### SLEEK DESIGN

The Xenon Ultra has an updated, modernized design to integrate seamlessly into your workflows and applications. Each model is equipped with disinfectant ready housing.

### SWAPPABLE POWER SOURCES

One cordless Bluetooth scanner can accept a standard battery or a super capacitor allowing customers to better manage their device pool and upgrade post deployment between power options.

### OBJECT DETECTION (IR)

Reduce annoying false activation and prevent customer disturbances with illumination only on when needed. IR also reduces the snappiness gap between point and shoot and hands-free modes of operation.

### UPGRADEABLE EXTENDED RANGE SCANNING

The flexible XR decode capability supports most scanning use cases in a single device without compromising range or speed, helping retailers get more done while managing fewer device types.
