

Run your ports and yards at peak efficiency with the MC9400/MC9450

Yards and ports are home to some of the toughest workflows in the supply chain – subzero temperatures, bright sunlight, hazardous materials, dust and scores of vehicles and cargo moving through a terminal. Fortunately, the MC9400/MC9450 is tough enough to handle it all. Now, the next evolution of the world's best-selling industrial computer offers new technologies that enable your workforce to do more than ever before — with new connectivity options that bring cost-effective mobility to the most expansive areas.

Decrease bottlenecks. Increase efficiencies. Connect your entire workforce with the ultra-rugged MC9400/MC9450. It gets the job done shift after shift.

How can the MC9400/MC9450 streamline your operations?

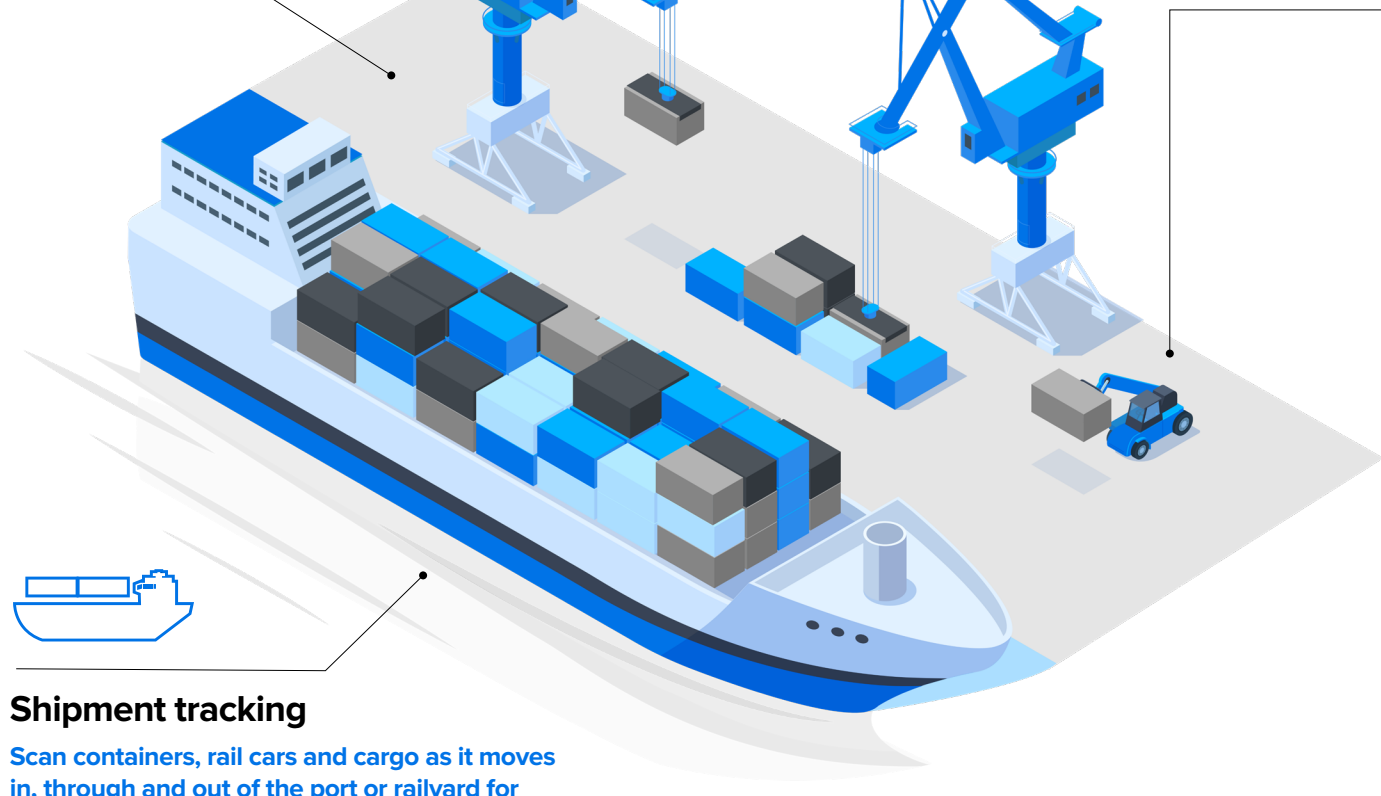

Yard management

Work orders are delivered to the right worker at the right time to ensure timely loading and unloading of incoming and outgoing shipments, maximize worker productivity and improve equipment utilization

Asset management (rail cars/containers/cargo)

Track containers, rail cars and material handling equipment to ensure assets are available and easy to locate when needed

Shipment tracking

Scan containers, rail cars and cargo as it moves in, through and out of the port or railyard for accurate real-time locationing of all shipments

Automatically capture shipping container IDs and more

Instantly capture shipping container IDs with Zebra's OCR Wedge for Container Identification — no more manual data entry required, saving time and preventing errors. Just aim the MC9400/MC9450 camera and center the container ID text in the frame — the text is captured and sent directly into your back-end yard management system. Other wedges capture vehicle identification numbers (VINs) and tire identification numbers (TINs) to help streamline vehicle and equipment maintenance.

Turbo charge your yard and port operations with all the right features

The next evolution in the ultra-rugged MC9000 Series — now with more power, extended range scanning, Wi-Fi 6E, 5G and private 5G

Private/Public 5G Affordable, reliable, low latency wireless data connectivity for your most challenging outdoor and expansive areas; simultaneously supports public and private 5G with dual SIM

Wi-Fi 6E Instant application response times; quadruple the bandwidth and capacity, triple the speed and up to triple the available spectrum than Wi-Fi 5

Extended range scanning Capture barcodes in hand to over 100 ft./30.5 m away; indoors and outside; green laser aimer is up to 7x more visible than red

Next generation platform 2.5x more processing power and 50% more RAM (Compared with MC9300) handles all your demanding applications simultaneously

Virtually indestructible Most rugged specs for maximum uptime; 12 ft./3.65 m drops to concrete; dusttight and waterproof

No more lost devices Easily track and find missing devices — even if they are powered down or the battery is depleted — with optional BLE battery and Mobility DNA Device Tracker license

High-res camera Takes highly detailed photos, ideal for documenting incoming damaged shipments and more

Cold chain support Freezer models provide reliable, condensation free operation in subzero temperatures and dramatic temperature swings

Instant collaboration Push-to-talk and secure messaging with Workcloud Communication Suite

Identity Guardian Biometric facial recognition gives workers easy device access for shared devices; faster access without typing and eliminates the risk of shared or compromised passwords

Well-loved ergonomics Gun-style design lets workers move and perform tasks more quickly, with more comfort

Backwards compatibility Use all the same accessories and chargers as drop-in replacements for the MC9300

A model for every environment

Standard model for general ultra-rugged use

Non-incendive model for use when hazardous materials are present

Freezer model for outdoor winter weather

Make sure your mobility solution doesn't stop when the conditions get tough. A [heated touch panel](#) ensures continuous visibility operations and heavy condensing conditions. A [freezer-rated battery](#) gives workers battery power they can trust during the longest, coldest shifts. And the [heated scanner exit window](#) ensures reliable data capture in freezing winter weather.

Take productivity to new heights with the MC9400/MC9450
