

## WHAT IS THE RS6100 BLUETOOTH WEARABLE SCANNER?

### Maximum versatility, power and performance

The RS6100 is Zebra's most powerful and versatile wearable scanner. It's small and practically weightless — just half the size and weight of its predecessor. An advanced multi-focus scan engine captures 1D and 2D barcodes in virtually any condition at close range and up to 40 ft./12.2 m away. Five interchangeable wearing styles ensure comfort for every worker, while the removable battery ensures it's always in service. The RS6100 is rugged and ready to use everywhere — warehouse aisles, freezers and coolers and out on the dock in rain, snow, blazing summer heat or subzero winter cold.

## WHY SHOULD YOU BUY THE RS6100?

### TOP 5 CUSTOMER BENEFITS

# 1

#### Achieve peak levels of productivity with multi-focus scanning.

Zebra's SE55 1D/2D Advanced Range scan engine with IntelliFocus™ technology captures barcodes over a wide working range — from 2 in./5.08 cm to 40 ft./12.2 m. This versatility makes it ideal for almost any industrial or retail application — picking small items in bins, receiving shrink-wrapped pallets outside, putting them away with a forklift and more. And with Zebra's exclusive PRZM technology, the RS6100 instantly captures barcodes in any condition, even if they are under shrinkwrap, damaged, covered in frost or poorly printed.

# 2

#### You're not locked into one wearable style.

Interchangeable wearing styles let you meet different use cases and user preferences — and you can switch wearing styles at any time. The Enterprise Hand Mount is available in a range of sizes for right and left hands for a custom fit. The single finger mount is available with a single or double trigger. The low profile of the ambidextrous Back of Hand Mount is ideal for picking in small spaces. The retractable lanyard can be worn on a belt or around the neck. And existing RS5100 single and double trigger mounts work with the RS6100 too.

# 3

#### Use it everywhere — outside on the dock, in the freezer and warehouse aisles.

The RS6100 is small and practically weightless — less than half the size and weight of the RS6000. At the same time, its rugged design can be used anywhere, even the freezer. With the extended battery, the RS6100 can operate down to -22° F/-30° C, so you can use the same lightweight wearable scanner in your cold chain applications. With IP65 sealing, the RS6100 is dust-tight and can handle hose-downs. And only the RS6100 is drop tested to 6 ft./1.8 m to concrete across the entire temperature range.

# 4

#### Battery solutions built for the enterprise.

Removable, replaceable batteries support back-to-back shifts — and you never need to return an RS6100 to the service depot just to replace an aging or faulty battery. Comprehensive battery metrics make it easy to manage battery health. If you prefer not to manage scanner batteries, you can use the corded adapter to power the RS6100 with select Zebra mobile computers. High capacity charge cradles and battery chargers minimize the space required in your equipment room — charge 100 RS6100 scanners with just 5 multi-slot ShareCradles.

# 5

#### Easy, cost-effective upgrade.

If you are currently using Zebra's RS5100 Wearable Scanners, it's easy to upgrade to the RS6100's extraordinary scanning range or freezer operation — or manage a mixed deployment. The RS6100 and RS5100 share common trigger assemblies, batteries and mounts. And if you have been using Zebra's RS6000 two-finger ring scanners, you'll get major benefits when you migrate to the latest platform — including superior ergonomics with a single finger design, half the size and weight, more than double the scanning range, more wearing options and more.

### APPLICATIONS

#### Warehousing/Distribution

- Warehouse management
- Receiving
- Picking
- Put away
- Sorting
- Loading

#### Manufacturing

- Inventory management
- Replenishment
- Parts tracking
- Sortation
- Assembly
- Finished goods verification

#### Transportation and Logistics

- Warehouse management

#### Retail

- Back of store warehouse management
- Receiving
- Inventory management
- Sortation
