

How to Empower Your Employee Workforce and Boost Business Efficiencies with Intel® NUC

With the rise of the hybrid workforce, employees need technology that helps them seamlessly transition between home and the office. Businesses often give workers tower PCs to use on-site and laptops to take home. However, tower PCs are bulky, use lots of electricity, and require extensive customizations to meet your needs. Meanwhile, laptops are prone to theft and damage. Both types of workstations age rapidly and become less efficient every day.

Many businesses are turning to mini PCs—specifically Intel NUCs—to boost hybrid working efficiencies. These small PCs are durable, portable, and can support the most data-intensive workflows such as video editing, coding, complex financial analysis, CAD design, and more.

HOW MINI PCS DELIVER BIG RESULTS

- **Support hybrid work:** Intel® NUCs are more rugged and less prone to breakage than laptops, making them ideal for frequent transport between home and the office.
- **Lower costs:** Intel® NUCs consume 50% less energy than tower PCs and can cut your power costs compared with a similarly configured desktop.
- **Make your working environment more comfortable:** Intel® NUCs generate less heat and noise than other workstations.
- **Increase employee efficiencies:** Working with two monitors and a keyboard can boost productivity by 39%. Intel® NUCs offer single, double, and triple video outputs so users can run up to eight displays for enhanced productivity.
- **Improve remote management:** Some NUCs allow IT teams to push down images, update patches, and perform routine maintenance remotely.

6 THINGS TO LOOK FOR IN A MINI-PC VENDOR

- Customizations based on your exact business needs
- A one-stop-shop that provides mini PCs, accessories, and consulting
- Longevity so they can support your technology as long as you plan to use it
- Unlimited technical assistance at no extra cost for the first year after purchase
- An extended warranty and efficient return policy
- A global footprint to support all your locations and employees

SIMPLY NUC OFFERS THE LATEST INTEL® NUCS

- **Dragon Canyon Pro** (Intel® NUC 12 Pro X)
- **Beast Canyon** (Intel® NUC 11 Extreme)
- **Topaz 2** (Powered by Intel®)
- **Quartz Canyon** (Intel® NUC 9 Pro)
- **Tiger Canyon** (Intel® NUC 11 Pro)
- **Emerald** (Powered by Intel®)
