
Automotive

The Challenge

Automobiles are all about mobility – keeping people moving, getting from A to B with freedom and control. The automotive industry should have equipment that keep their work moving just as freely. Vehicles are as valuable and necessary a luxury as having a roof over our heads; they make our way of living simpler by bringing everything within closer range and attainability.

The importance of tracking such luxury items cannot be stressed enough, which is where **Socket Mobile's** data capture and delivery solutions come into play.

The Solution

Socket Mobile's barcode scanners are intended to keep the fluidity of a day on the job by improving efficiency and minimizing errors in everyday operations. Just point and click your Socket Mobile barcode scanner with *Bluetooth®* wireless technology for instant data capture.

"Socket barcode scanners can instantly and accurately capture a vehicle's VIN code. It makes a dealer's job easier and improves a customer's experience."-- Charlie Vogelheim, editor, Kelley Blue Book

All of Socket Mobile's scanners have their perks, but the DuraScan models were built just as tough as automotive workers – withstanding dirt, falls, and moisture to get the job done.

Whether it is on the production line, an auction, dealership, or even in the parts, services, and maintenance department, Socket Mobile offers solutions that will help keep your auto **business revving with increased energy and speed. You can't race to the finish line unless** you have the proper engineering under your hood. Keep your business running smoothly with the help of Socket Mobile scanners.

Socket Mobile's automotive solutions:

- View inventory in real-time
- Reduce over-stocking materials
- Reduce paper-based processes and minimize errors
- Track vehicle identification number (VIN) information and associated activities

- Look up pricing, inventory, vehicle history or account information anytime, anywhere
