

# Work-In-Progress (WIP) Asset Tracking with RFID

With Zebra's RFID work-in-progress asset tracking solutions, it's possible to gain end-to-end visibility of the movement and progress of each asset at each stage of production. Digitalizing and automating eliminates manual searches, errors, and prevents risks like downtime.

## Results You Can Expect

- Track raw materials in real time for optimal stock levels.
- Quickly identify and resolve bottlenecks to maximize production uptime.
- Monitor order status to enhance the customer experience.
- Free workers to focus on higher value tasks.
- Optimize workflows to drive efficiencies and achieve KPIs.

## Real Results Achieved with RFID

Outcomes achieved by G3 Boats.

**4%**  
Productivity  
gain site-wide

**12.5%**  
Increase of unit  
output

**2.5%**  
Direct labor  
hours saved  
weekly

**1** Passive RFID tags are printed (RFID printer) and applied to each asset.

**2** RFID readers are set up at key intervals to capture each stage of the production, storage and distribution process.

**3** As assets move through the facility, their location is automatically tracked, enabling alerts and quicker problem resolution.

**4** Employees can view the near real-time location of assets and gain process visibility to monitor each department's health.
